

Sage Rebello

Product Designer

908-616-4790 | sagellen21@gmail.com | Portfolio : sager13.github.io

SKILLS

Design: Product Design, Interaction Design, UX Research, Motion Design

Prototyping: CAD, Physical Prototyping, Rapid Iteration, Arduino

Software: Cursor, SwiftUI, Python, JavaScript, HTML, CSS, C++, Java

Tools: Figma, Adobe CC, Blender, Procreate, Miro

EDUCATION

Master of Arts in Design Engineering (MADE)

Brown University + RISD | 2025–2026

Bachelor of Fine Arts

Cornell University | 2021–2025

HONORS

Dean's List (Spring 2025)

ABRSM Piano Exam - Highest Distinction (2018)

LINKS

Rock On, Raccoon! Game

ABOUT

MA Design Engineering student at Brown University & Rhode Island School of Design (RISD) with a background in product design, UI/UX, and motion storytelling. I build human-centered prototypes that blend digital interaction, physical systems, and strong visual craft, by translating complex problems into tangible experiences.

EXPERIENCE

Brown University: Agentic AI Design Research Lab | Fall 2026

AI Design Researcher & Product Developer

- Researching emerging agentic AI paradigms and translate findings into human-centered product concepts and interactive prototypes.
- Leading AI product development and user evaluation, iterating on working prototypes to validate experiences and inform research outcomes.

Pluriversal Futures Design Lab | 2024-2025

Designer Researcher & Motion Graphics Animator

- Produced and animated 10-minute speculative design film communicating future social scenarios
- Developed storyboards, motion language, and visual systems across Adobe After Effects + Procreate

MassDigi Summer Innovation Program | Summer 2023

Producer & Co-creator & UI/UX Designer

- Led development of mobile rhythm game (Rock On, Raccoon!)
- Created UI assets, visual design system, and level background artwork
- Presented product to stakeholders and industry professionals
- Delivered animated trailer and launch-ready app store release

Brown University: Visual & Interactive Communication | Winter 2025

Product Designer & Hardware Programmer

- Designed and soldered interactive circuitry for Imagimals, a modular physical product prototype (Hall sensors, RGB LEDs, Arduino, I2C)
- Fabricated woodcut enclosure components and integrated embedded magnets for modular assembly
- Iterated through multiple hardware prototypes to improve reliability and user interaction

Cornell University: Communication Game Development Course | Spring 2024

Design Lead & Co-creator

- Directed weekly design sprints and produced game trailer
- Designed environments and UI screens for stealth PC game Knead for Speed

LEADERSHIP / VOLUNTEERING

Cornell Undergraduate Research Journal (CURJ) | 2021-2024

Director of Design

- Organized and oversaw visual identity system for journal
- Led and mentored graphic design team through production workflow
